

TO WHOM IT MAY CONCERN

November 22, 2016

This is a letter of recommendation on behalf of Nicholas Eisenberg, whom I understand is applying for a tutoring position.

I met Nicholas in the fall of 2015, when he was taking the first semester graduate course on Real Analysis (MAT 707). I feel I must explain the composition of the class and how Nicholas ranked among the students in MAT 707.

MAT 707 started with 13 students that included *11 graduate students* (7 in the doctoral program and 4 in the master program), *3 undergraduate senior students* (who were allowed to take this graduate level course) as well as *2 non-degree seeking students*. Of those 13 students, only 3 earned an A grade, 2 being doctoral students and the third one being Nicholas, then one of the 3 undergraduate students. Clearly, I was very impressed by his performance!

The second part of the Real Analysis course (MAT 708) followed in the spring of 2016, with now 9 enrolled students (8 who had taken MAT 707 with an A or B grade, and one among the non-degree seeking students). This time 4 of those students earned an A grade, and Nicholas, now a student deservingly admitted to the graduate program, being among those students. I should mention that the one-year sequence MAT 707-708 is known to be one of the hardest sequences in the math graduate program. Thus, being one of his instructors for the past academic year, the above describes my experience with Nicholas Eisenberg.

In summary, I find Nicholas Eisenberg to be a bright young man with a great potential for graduate studies and research, and I strongly recommend him for a tutoring or any related position that he may be seeking!

Sincerely,

A handwritten signature in black ink that reads "David G. Costa". The signature is fluid and cursive, with the first letters of the first and last names being capitalized and prominent.

**David G. Costa
Professor of Mathematics
Department of Mathematical Sciences
University of Nevada, Las Vegas**
