Experience

Senior Data Scientist

July 2022 - Present

company like a national lab

- Trained a Keras model consisting of LSTM and dense layers to forecast future performance of an X-ray machine which resulted in improved maintenance planning and machine repair time
- Developed interactive dashboards using Streamlit and Panel to visually present complex data and provide actionable insights to fellow scientists and stakeholders
- Used Pytorch and Scikit-image to model the spot of an X-ray machine to deconvolve and deblur X-ray images
- Lead investigator for a data engineering project involving the organization and feature extraction from a dataset consisting of 12 years of data from a linear accelerator at the [LAB NAME] National Lab
- Maintainer of a company-wide internal seismic data-processing Python library hosted on our internal GitLab
- Mentored a student summer-intern and conducted weekly code review meetings to ensure best practices in programming
- Built and managed a MySQL database of seismic sensor metadata
- Utilized Neovim, Tmux, Vim-Slime and SSH to run code on our internal Linux cloud server

Graduate Teaching Assistant

January 2016 - June 2022

Ph.D Univeristy and M.S University

- Instructed courses in College Algebra and Pre-Calculus
- Led weekly recitation sections for Mathematical Statistics, Real Analysis and Calculus I, II and III
- Managed Ph.D University's math tutoring center of 14 tutors

Technical Skills

Programming Languages: Python, SQL, R, Lua, L^AT_EX

Libraries: Tensorflow, Keras, Pytorch, Scikit-Learn, Scipy, Plotly, Panel, Pandas, Pyarrow, Ssqlalchemy

Developer Tools: Git, Unix/Linux, Neovim, Tmux, SSH

Publications

- 1: First publication. Published in a top stochastic analysis journal
- 2: Second Publicatrion. Submitted to a q2 propability journal. Preprint on arxiv

Education

University - Ph.D.

June 2022

Research Area: Probability (Stochastic Processes and Partial Differential Equations)

Advisor: advisors web page

University - B.S./M.S.

December 2015 / January 2018

Major: Applied Mathematics
